# Vitamin & Mineral Premix-1 Dairy Cattle

Dairy Super Premix is a fine combination of Vitamins, Minerals and Anti Oxidants, it is useful for the Prevention of vitamins and mineral deficiencies.

Dairy Super Premix improves milk yield, boosts immunity, prevents anaemia, bone disorders, grass tetany & milk Fever. Dairy Super Premix also Improves reproductive efficiency and feed intake.

Mineral ions and vitamins are the co-factors of different enzymes that contributes to the normal functioning of enzymes and hormones.

Antioxidants prevents free-radical formation in feed and stop mould growth, therefore it is effective in reducing the challenges of mycotoxin.

## **DOSAGE:**

**Dairy Cow: 50gm/day/head**

**Dairy Buffalo: 80gm/day/head**

**Packing: 25 Kg**

# Vitamin & Mineral Premix-2 Dairy Cattle

- Rapid correction in deficiencies
- Optimizes growth rate in young stock
- Reduces calving intervals
- Optimizes conception rate
- Improves skin coat & hoof health
- Optimizes immune responses
- Economical in use

## **DOSAGE:**

5 - 10 gm per day per animal  
or 1000 - 1500 gm per Ton of compound feed  
or as directed by consultant

## **Packing: 25 Kg**

## Per Kg of Feed Contains

<i>Vitamin A</i>	<i>10000 IU</i>
<i>Vitamin D3</i>	<i>2000 IU</i>
<i>Vitamin E</i>	<i>50 IU</i>
<i>Vitamin B3</i>	<i>20 mg</i>
<i>Cu</i>	<i>22.00 mg</i>
<i>Zn</i>	<i>88.00 mg</i>
<i>Mn</i>	<i>20.00 mg</i>
<i>co</i>	<i>2.50 mg</i>
<i>Iodine</i>	<i>6 mg</i>
<i>Fe</i>	<i>40 mg</i>

# **Vitamin & Mineral Premix-HP (High Producing Animals)**

Replenishes high metabolizable energy requirement  
Enhances conception by improving reproductive functions  
Compliments to the high drain of minerals, protein & fat  
Improves immunity, digestion & overall lactation yield

## **DOSAGE:**

***Adult Cattle & Buffalo***

***50 gm daily***

***Breeding Bulls***

***100 gm daily***

***or As Directed by Consultant***

**Packing: 25 Kg**

# Essential Vitamin Nutrition (Dairy)

It is specifically developed to provide optimum nutrition for Livestock during their entire productive life through feeds. This includes optimum levels that meet the vitamin needs for health and productivity in real time situation. This ensures the demands of vitamins, growing due to enhanced genetic potential, conventional premixes do not meet these requirements.

## Composition

Each 1 Kg contains : Vitamin A 50000000 IU, Vitamin D3 , 10000000 IU, Vitamin K 4000 IU Vitamin B12, 100000 mcg, Vitamin E 200000 mg, Niacin 48000 mg, Biotin 40000 mcg

Boost  
Immune  
Functions

Homogenous  
Mixture

Improves  
Coat  
Condition

Better  
herd health

## Indications

Post disease exposure  
Stunted growth  
On set of stressful conditions

## Dosage

250 gm per 1kg of feed  
or As directed by Consultant

## Advantages

Helps to normal physiological function  
Helps to maintain normal health & production  
Elevate the protective immunity mechanism  
Most suitable in the conditions like advanced pregnancy,  
repeat breeding, delayed sexual maturity etc.

## Packing

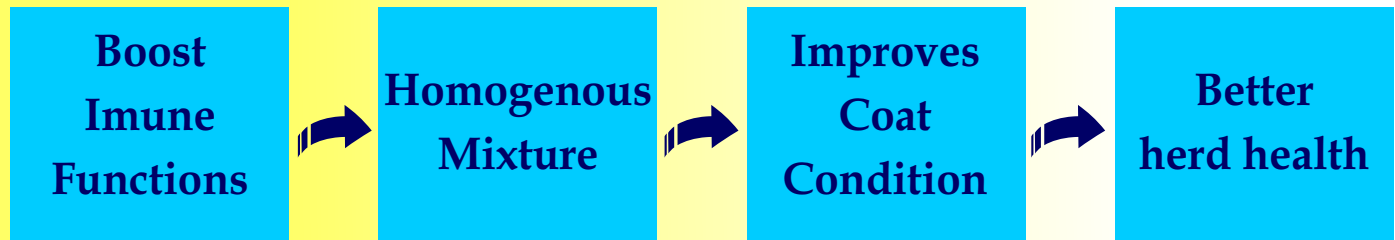

# Trace Mineral Nutrition (Dairy)

Future herd success depends on the quality of dairy replacement heifers entering the herd. Proper trace mineral nutrition during this critical period plays a key role in important dairy replacement heifer development factors such as feed efficiency, claw integrity and immune function. Protomin helps to build the foundation for long-term herd health and performance.

## Composition

Each 300 gm contains: Organic Copper 4.2 gm, Organic Cobalt 200 mg, Organic Zinc 9.6 gm, Organic Manganese 1.5 gm, Iodine 1.0 gm, Iron 6.0 mg, Magnesium 50.0 gm

## Indications

- Stunted growth
- Micro mineral deficiencies
- Long disease exposure

## Advantages

- Delivers specific nutrients
- Reduces inter-calving period
- Reduces lameness
- Improved skeletal and muscle growth/development

## Dosage

300 gm per 100 kg of feed  
or As directed by Consultant

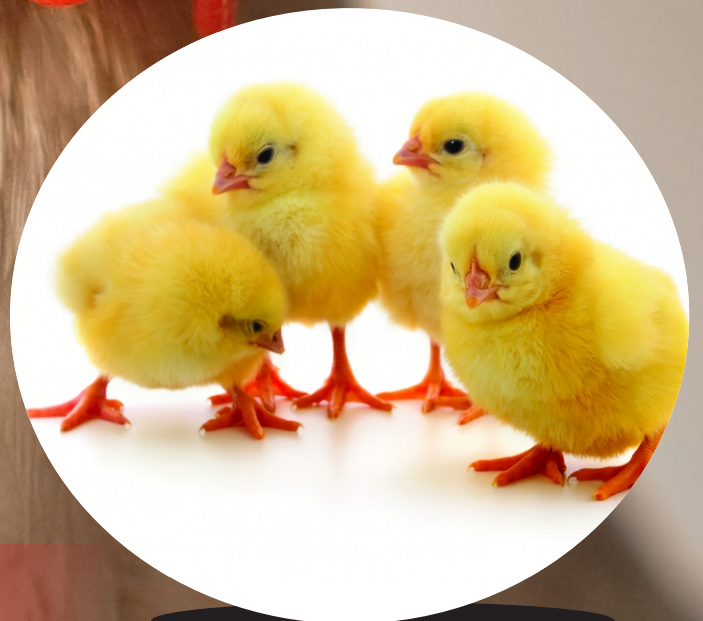

**Packing**

**25Kg**

ANIMAL NUTRITIONS

# Vitamin Premix-1

(Poultry Feed Grade)

**Dosage-**  
500 g / Ton of feed  
**Or As Directed  
By  
Consultant**

- Provides optimum level of essential vitamin
- Stimulates growth & production
- Improves immune functions
- Improves feed conversion
- Maintains normal health & reproduction

**Packing  
25 kg**

# Mineral Premix-1 (Poultry Feed Grade)

## Benefits-

- Provides optimum level of trace minerals in single inclusion
- Improves growth & production
- Improves immune functions

## Dosage-

**500 g / Ton of feed  
or As directed by Consultant**

**Packing: 25 Kg**

# Vitamin Premix-2 (Poultry Feed Grade)

## Dosage-

500 g / Ton of feed  
or As directed by  
Consultant

- Provides optimum level of essential vitamin
- Stimulates growth & production
- Improves immune functions
- Improves feed conversion
- Maintains normal health & reproduction

**Packing: 25 Kg**

# Mineral Premix-2 (Poultry Feed Grade)

## Dosage-

500 g / Ton of feed  
or As directed by  
Consultant

## Benefits-

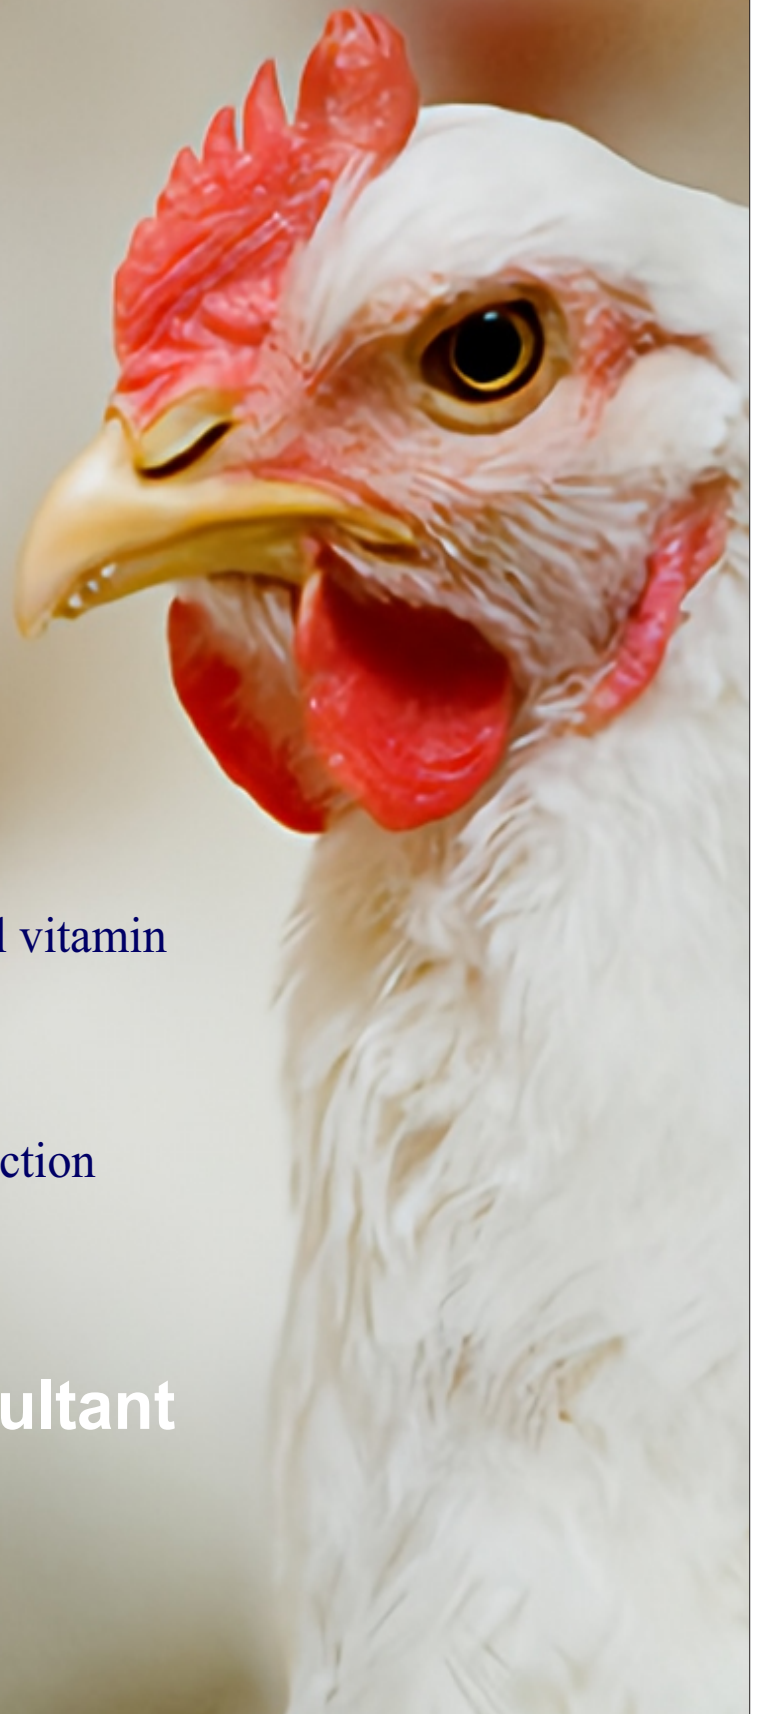

- Provides optimum level of trace minerals in single inclusion
- Improves growth & production
- Improves immune functions

Packing :  
25 kg

# Vitamin Premix-BS

(Broiler Starter Feed Grade)

- Provides optimum level of essential vitamin
- Stimulates growth & production
- Improves immune functions
- Improves feed conversion
- Maintains normal health & reproduction

## **Dosage-**

**500 g / Ton of feed  
or As directed by Consultant**

**Packing: 25 Kg**

# Mineral Premix-BS (Broiler Starter Feed Grade)

## Benefits-

- Provides optimum level of trace minerals in single inclusion
- Improves growth & production
- Improves immune functions

### Dosage-

500 g / Ton of feed  
or As directed by Consultant

Packing: 25 Kg

# Vitamin Premix-BF (Broiler Finisher)

## Benefits-

- Improves digestibility & assimilation of nutrients in chicks.
- Excellent choice for uniform flock performance.
- Improves immunity.
- Reduces stress due to vaccination, deworming, transportation, debeaking, etc.
- Improves laying performance reduced due to intense heat, illness, cold or cage-fatigue.
- Enhances egg production & shell quality.

## Dosage-

500 g / Ton of feed

**or As directed by Consultant**

**Packing: 25 Kg**

# Mineral Premix-BF

## (Broiler Finisher Feed Grade)

### Benefits-

- Provides optimum level of trace minerals in single inclusion
- Improves growth & production
- Improves immune functions

### Dosage-

500 g / Ton of feed

or As directed by Consultant

Packing: 25 Kg

# **Vitamin Premix-BB (Broiler Breeder Feed Grade)**

- Provides optimum level of essential vitamin
- Stimulates growth & production
- Improves immune functions
- Improves feed conversion
- Maintains normal health & reproduction

## **Dosage-**

500 g / Ton of feed

**or As directed by Consultant**

**Packing : 25 kg**

# **Mineral Premix-BB (Broiler Breeder Feed Grade)**

- Provides optimum level of trace minerals in single inclusion
- Improves growth & production
- Improves immune functions

## **Dosage-**

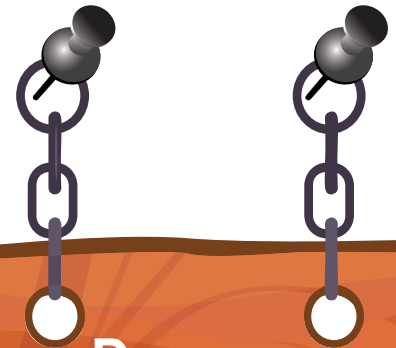

500 g / Ton of feed

**or As directed by Consultant**

**Packing : 25 kg**

# Vitamin Premix-LB (Layer Breeder Feed Grade)

**Dosage-**  
500 g / Ton of feed  
or As directed  
by Consultant

- Provides optimum level of essential vitamin
- Stimulates growth & production
- Improves immune functions
- Improves feed conversion
- Maintains normal health & reproduction

**Packing : 25 kg**

# Mineral Premix-LB (Layer Breeder Feed Grade)

- Provides optimum level of essential vitamin
- Stimulates growth & production
- Improves immune functions
- Improves feed conversion
- Maintains normal health & reproduction

**Packing : 25 kg**

# Vitamin Premix-HD (Poultry Feed Grade)

- Provides optimum level of essential vitamin
- Stimulates growth & production
- Improves immune functions
- Improves feed conversion
- Maintains normal health & reproduction

## **Dosage-**

500 g / Ton of feed

**or As directed by Consultant**

# Mineral Premix-HD (Poultry Feed Grade)

- Provides optimum level of essential vitamin
- Stimulates growth & production
- Improves immune functions
- Improves feed conversion
- Maintains normal health & reproduction

## **Dosage-**

500 g / Ton of feed

**or As directed by Consultant**

# Vitamin & Mineral Premix For Poultry (Feed Grade)

Dosage-  
1Kg / Ton of feed  
or As directed by Consultant

## Benefits-

- Provides optimum level of trace minerals in single inclusion
- Improves growth & production
- Improves immune functions

# Vitamin & Mineral Combination For Poultry

## Benefits-

- Improves digestibility & assimilation of nutrients in chicks.
- Excellent choice for uniform flock performance.
- Improves immunity.
- Reduces stress due to vaccination, deworming, transportation, debeaking, etc.
- Improves laying performance reduced due to intense heat, illness, cold or cage-fatigue.
- Enhances egg production & shell quality.

## Dosage-

**0.5gm-2gm/ Ltr of water for 5-7 days  
or as directed by consultant**

## Packing:

100gm & 500gm

# Multi Vitamin & Multi Mineral Combination

## Benefits-

- Reduces stress due to vaccination, deworming, transportation, debeaking, etc.
- Enhances immune response.
- Improves laying performance reduced due to intense heat, illness, cold or cage-fatigue.
- Enhances egg production & shell quality.
- Overcomes stress condition and improves weight gain in broilers.

## Dosage-

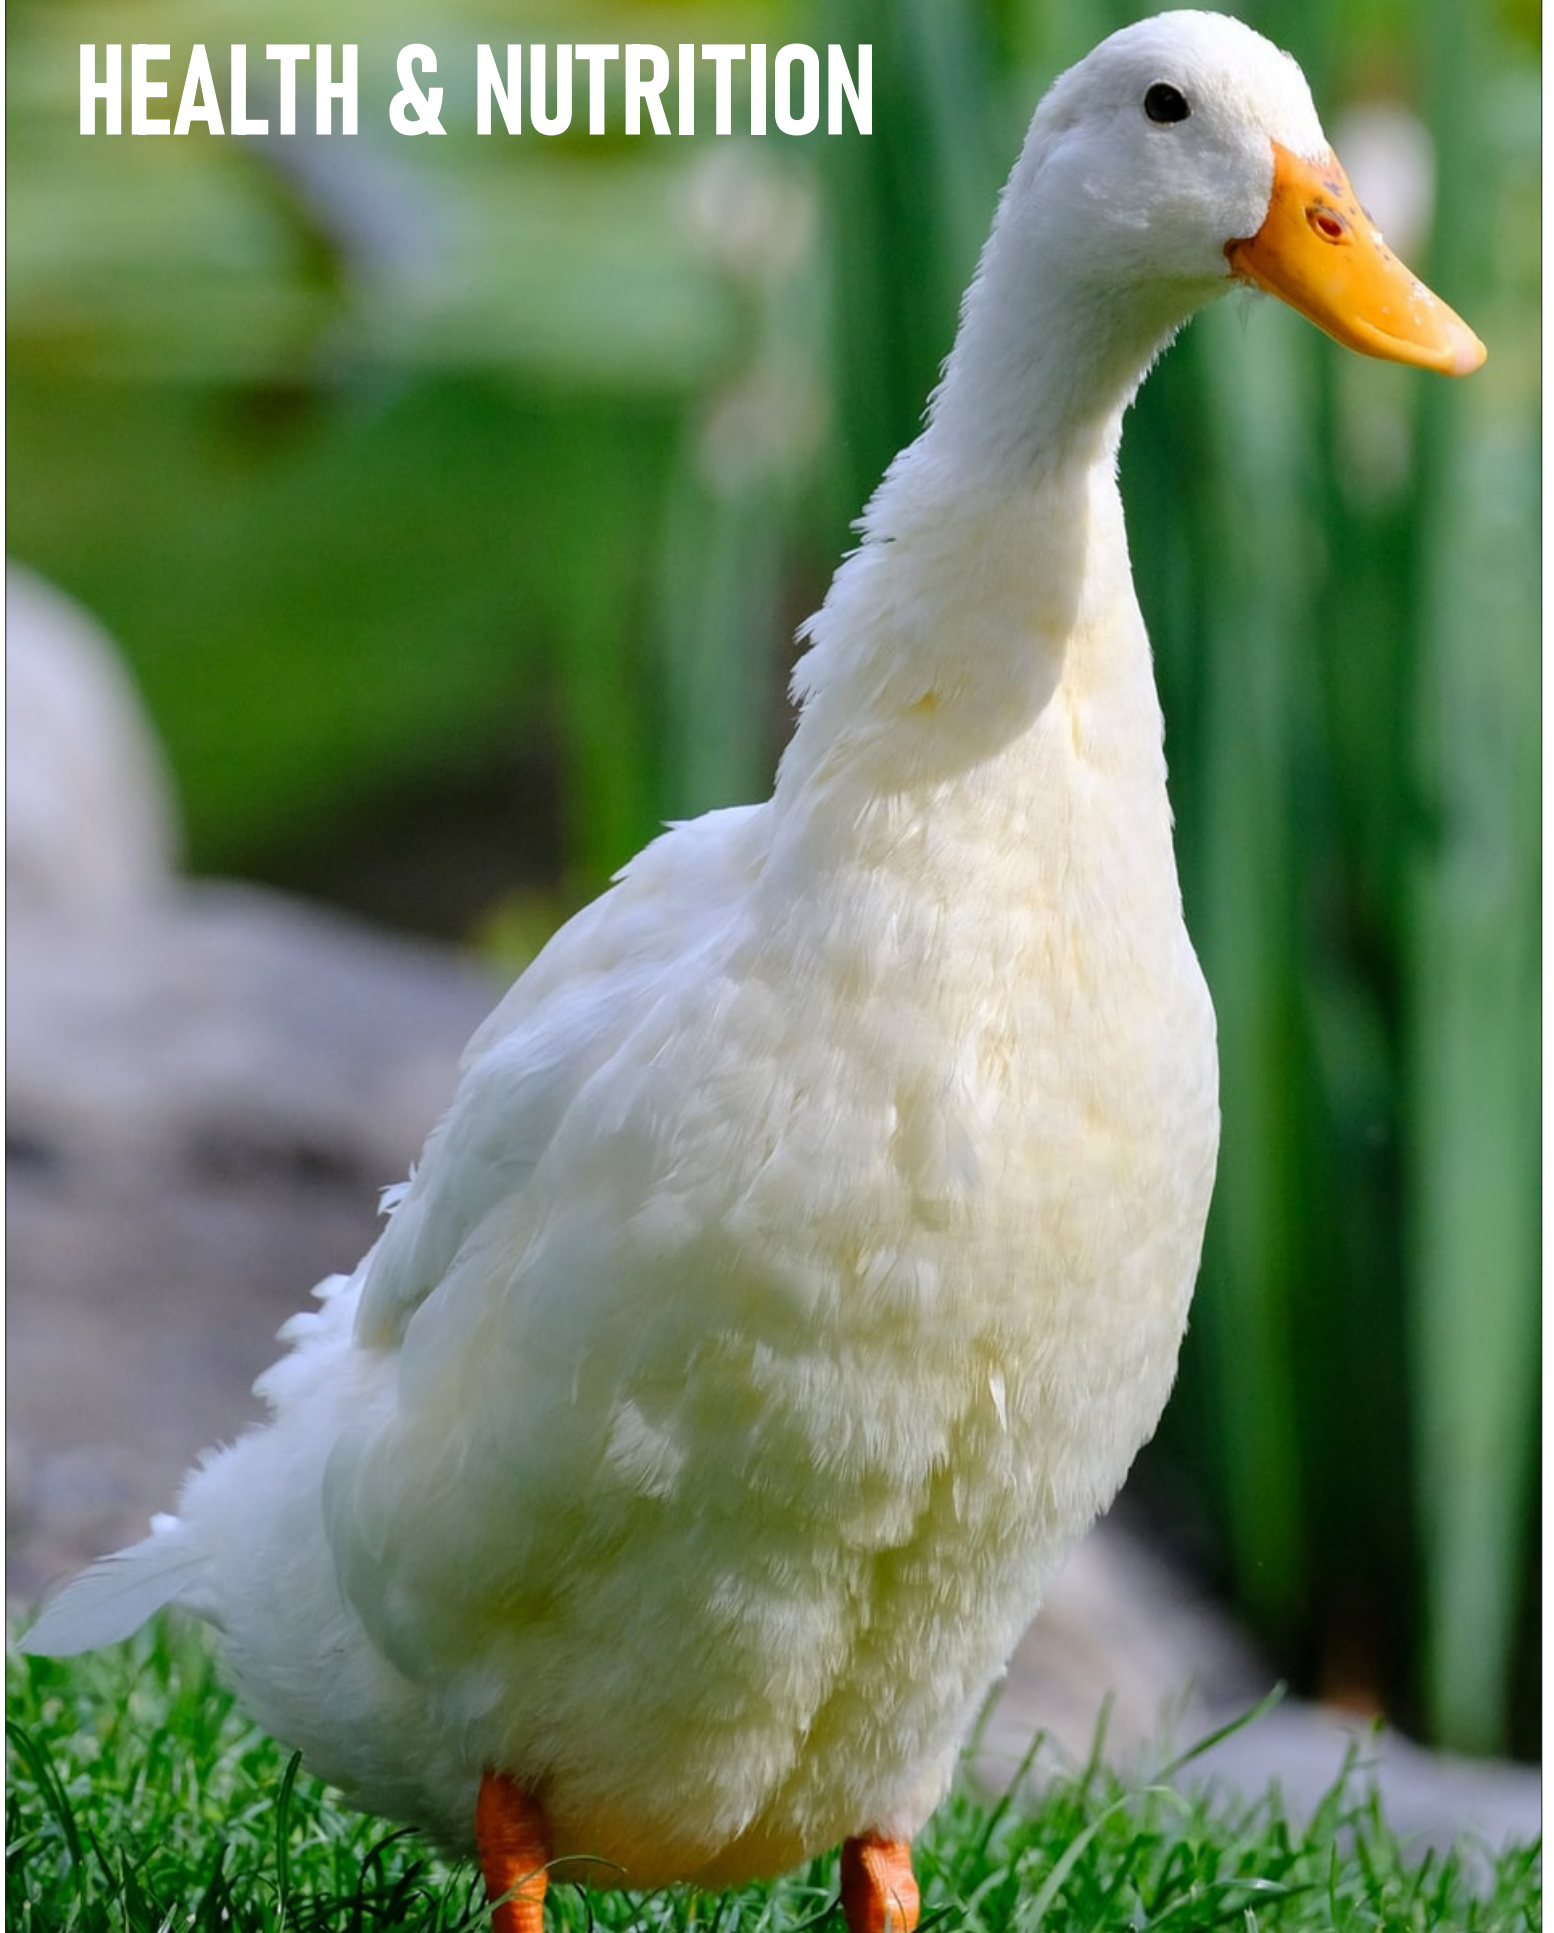

**2 - 5 ml per 100 chicks for 5 days**  
**5 ml per 100 broiler/layers for 5 days**  
**or as directed by consultant**

## Packing

**500ml & 1 Litter**

# HEALTH & NUTRITION

# VITAMIN PREMIX FOR DUCKS (FEED GRADE)

## Benefits-

- Increase feed intake. Enhance the feed conversion
- Promote the production speed. Improve the meat quality
- Increase the survival rate of the infant Duck
- Increase laying rate of the breeding Duck
- Prevent the different stress response

**Packing: 25 Kg**

# MINERAL PREMIX FOR DUCKS (FEED GRADE)

## Benefits-

- Provides optimum level of trace minerals in single inclusion
- Improves growth & production
- Improves immune functions

## Dosage-

1 Kg / Ton of feed

**or As directed by Consultant**

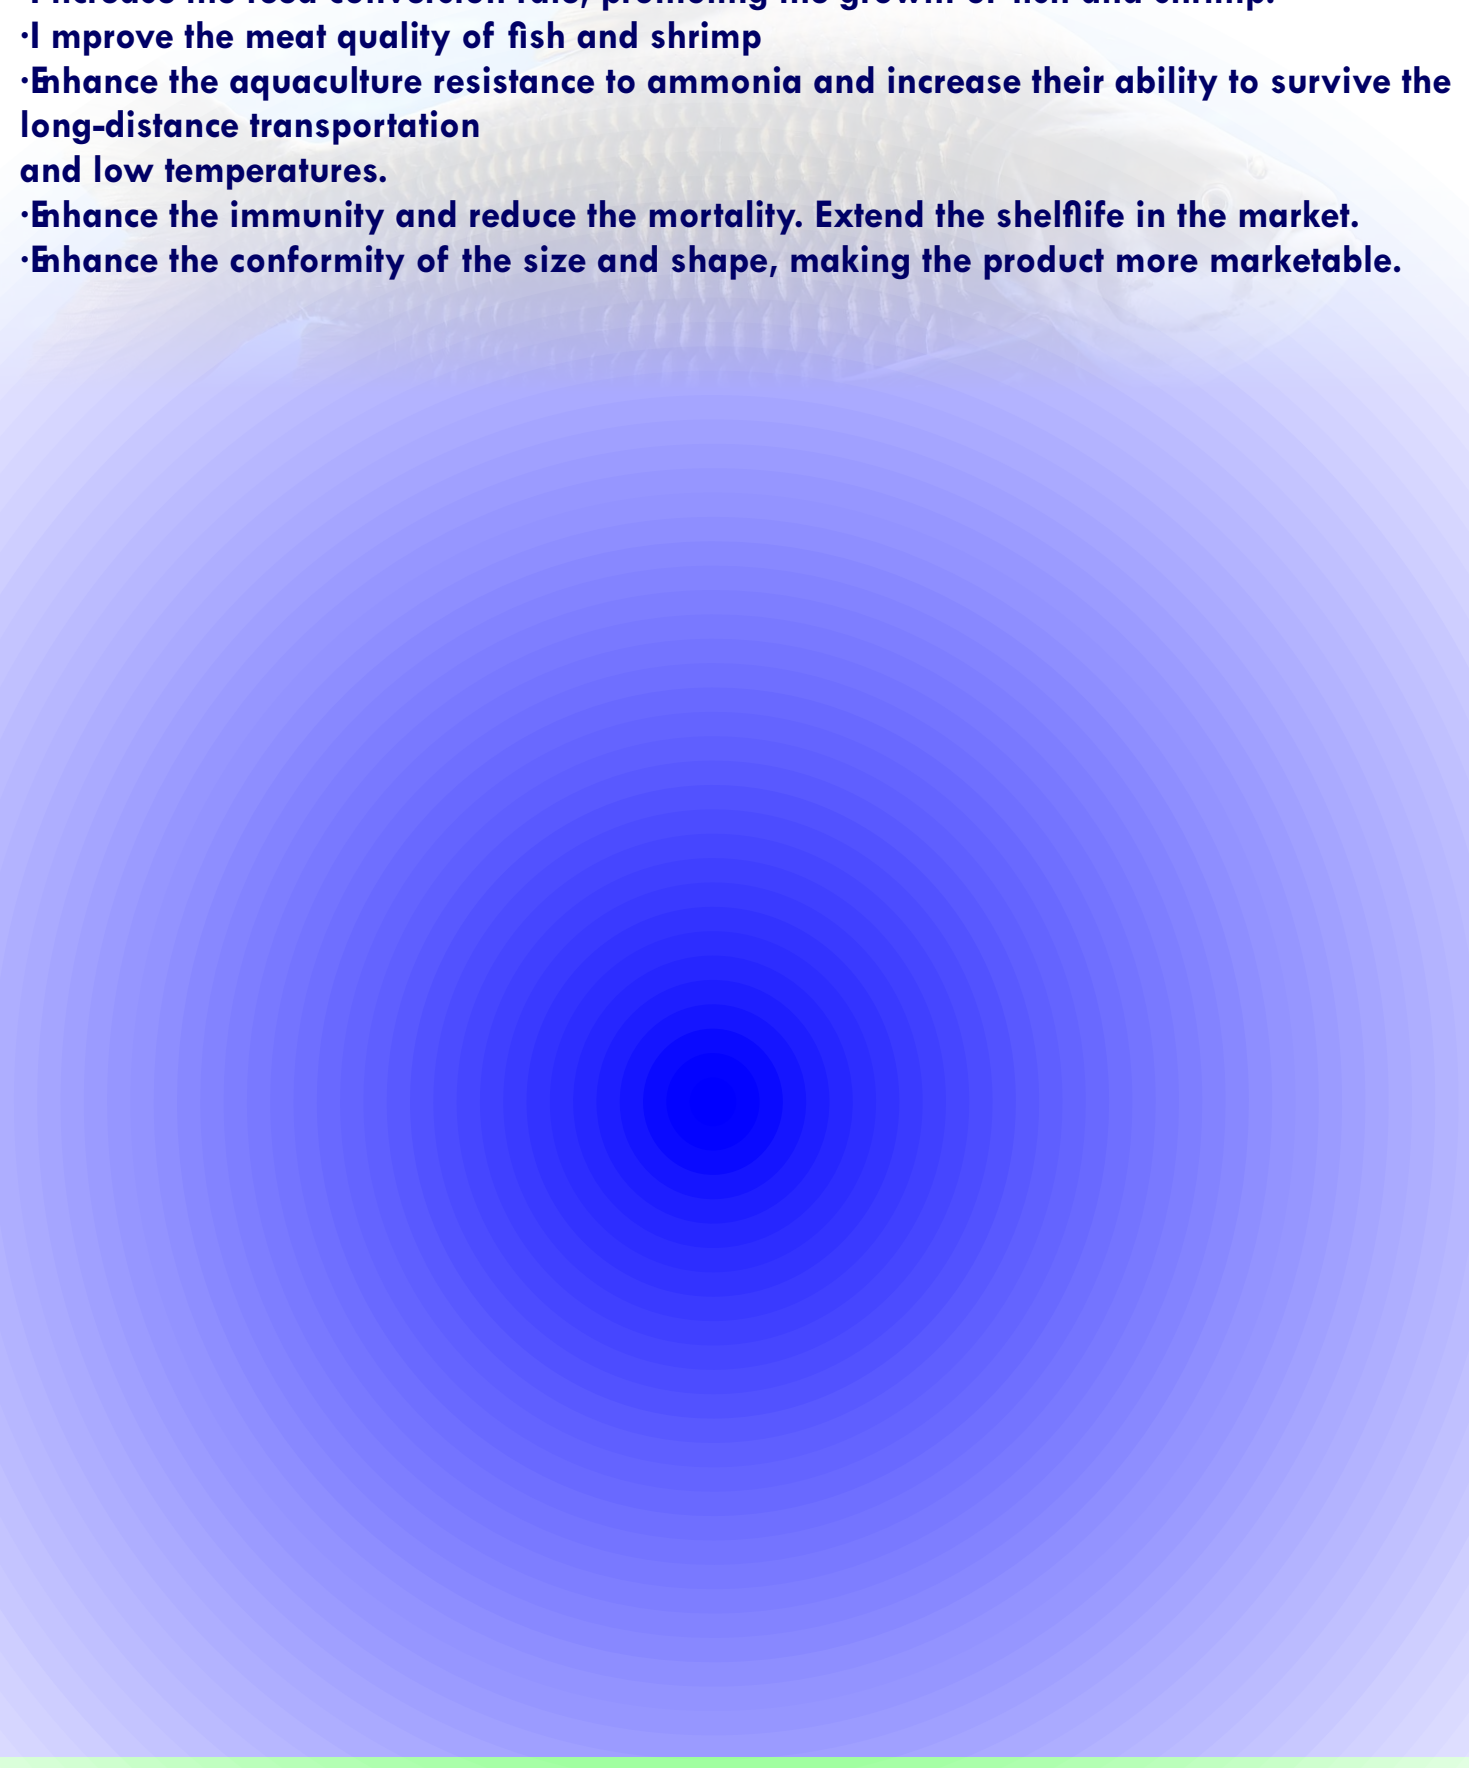

**Packing : 25 kg**

# HEALTH & NUTRITION

# Vitamin Premix for Aquatic Animals

- This products series is designed specifically for aquatic animals, such as fish, shrimp, soft -shelled turtle, crab, etc.
  - Increase the feed conversion rate, promoting the growth of fish and shrimp.
  - Improve the meat quality of fish and shrimp
  - Enhance the aquaculture resistance to ammonia and increase their ability to survive the long-distance transportation and low temperatures.
  - Enhance the immunity and reduce the mortality. Extend the shelflife in the market.
  - Enhance the conformity of the size and shape, making the product more marketable.
- 

Vitamins	Units	S501 Shrimp	P501 Prawn	E 501 Eel	T 501 Tilapia
